Hi Sean. Yes everyone has been wearing their PFD's this morning. The Vermco representative (photographed in the Navy blue coat) has a PFD under his jacket (zipper open for access), with his back turned. It's hard to see, but the top bib of the PFD around their necks pokes out a bit. That may have been hard to identify in the last email. Here are some clearer photos of crew members with PFDs more visible, from the front.

Thank you,

Jonni

Thank you Jonni. Looks like at least one person is missing a PFD, could you verify that all are wearing some class of PFD?

Good morning,

The Next Generation vessel is currently stationed at Target location AR-A26 (RM 8) downloading data to a jump drive. The Pre-RD group has successfully located and downloaded data, updated battery, firmware, and memory on AR-25. Included are photos of the retrieval AR-A26
